About Me

Computer Science Global Class Student | AI Researcher | Full-Stack Developer Currently an exchange student in Taiwan focusing on AI and Cloud Security. I am keen for learning opportunities that can enhance my skills by applying my knowledge to real-world problems.

Education

BINUS University <i>Bachelor of Computer Science Global Class; Artificial Intelligence</i>	September 2023 - May 2027 (Expected)
Chang Gung University <i>Bachelor of Artificial Intelligence; Exchange Student</i>	February 2026 - June 2026

Experience

PT Bank Hibank Indonesia <i>People Data Analytics Intern</i> - Architected and developed a comprehensive full-stack web platform to centralize all Human Capital services, delivering a secure, responsive, and highly intuitive user interface for internal employees. - Engineered an automated, database-driven attendance tracking system specifically tailored for the internship program, ensuring accurate, real-time data collection and significantly reducing manual administrative workflows. - Bridged complex data analytics with functional UI/UX by structuring backend organizational data and transforming raw metrics into accessible, interactive dashboards to support HR decision-making.	June 2026 – December 2026 (Expected)
HIMTI BINUS University (Student Organization in BINUS University) <i>Regional Secretary of HIMTI Alam Sutera 2025/2026</i> - Managed the end-to-end flow of organizational documentation, including high-level proposals, work agreements, and official reports. - Ensured administrative accuracy and operational efficiency across the regional student organization’s internal activities. - Coordinated cross-functional communication to maintain standardized organizational workflows.	March 2025 – March 2026
BINUS University <i>Freshmen Leader & Freshmen Partner</i> - Facilitated a series of workshops and technical development sessions aimed at accelerating the orientation of first-year students. - Provided consistent weekly mentoring to support freshmen in navigating university resources and academic expectations. - Led community-building initiatives to foster long-term student engagement and a supportive academic environment.	March 2024 – March 2025

Tangerang, Indonesia

Projects

Security GNN: Graph-Based Anomaly Detection Published - Designed a system to model interactions between IP addresses and DNS queries as a Multi-Directed Graph to detect malicious system activity. - Engineered a custom GNN architecture to process edge-level embeddings from system logs, enabling binary classification of "evil" network events. - Utilized NetworkX for complex relational mapping and PyTorch for non-linear pattern recognition on the BETH security dataset. - Tech Stack: Python, FastAPI, React.js, OpenAI, AWS Elasticbeanstalk, PostgreSQL.	April 2025 – September 2025
MoodSense: Semantic Music Recommendation System GitHub - Developed an end-to-end AI tool that leverages Natural Language Processing (NLP) to recommend songs based on the emotional context of diary entries. - Implemented FAISS (Facebook AI Similarity Search) for high-speed vector retrieval across high-dimensional lyrical embeddings. - Built and deployed an interactive web interface using Gradio to facilitate real-time user testing and mood-matching demonstrations.	March 2025 – June 2025

Semantic Analyzer for Textual Meaning Extraction| [GitHub](#)

October 2025 – December 2025

- Developed an end-to-end AI tool that leverages Natural Language Processing (NLP) to recommend songs based on the emotional context of diary entries.
- Implemented FAISS (Facebook AI Similarity Search) for high-speed vector retrieval across high-dimensional lyrical embeddings.
- Built and deployed an interactive web interface using Gradio to facilitate real-time user testing and mood-matching demonstrations.

Skills

- **Languages:** English (Fluent), Indonesian (Native)
- **Language and Tools :** JavaScript, HTML, CSS, Next.js, Python, Java, MySQL, MongoDB, GitHub, Figma, PHP
- **Technical:** Artificial Intelligence, Natural Language Processing, Computer Vision, Data Structures and Algorithms, Machine Learning, Cybersecurity
